

Nexora Corporate Knowledge Base: Remote Work Policy

Target Role: ALL | Version: Official | Published: 2026-09-25

1. Remote-First Philosophy

Nexora is a remote-first organization. Employees can work from any approved domestic or international location with reliable high-speed internet (>50 Mbps download / >10 Mbps upload).

2. Equipment and Home Office Stipend

Upon joining, every full-time employee is eligible for a one-time \$500 USD Ergonomic Home Office Stipend for desks, chairs, monitors, and peripherals. Company-issued MacBook Pro or ThinkPad workstations are provided directly by IT Ops.

3. Monthly Internet Allowance

Nexora provides a monthly recurring \$50 USD internet stipend to subsidize high-speed residential broadband. This allowance is automatically reimbursed on monthly payroll.

4. Coworking Space Subsidies

Employees who prefer working outside the home can expense up to \$250 USD per month for hot-desk memberships at certified coworking spaces (e.g. WeWork, Industrious).

6. Remote Security Baseline

Remote work requires the same controls as office work: full-disk encryption, locked screens, Zero-Trust VPN for internal systems, and no sensitive work over untrusted networks without VPN.

7. Timezone Overlap

Distributed teammates outside EST arrange at least 3 hours of overlap with the 10:00 AM to 3:00 PM EST core window on team-agreed days, keeping async-first norms otherwise.

8. Onsite Gatherings

Teams may expense quarterly onsites for planning and cohesion. Travel follows the Expense Policy flight, hotel, and per diem rules.
