

Nexora Corporate Knowledge Base: Data Privacy and GDPR

Target Role: ALL | Version: Official | Published: 2026-09-24

1. Compliance Framework

Nexora complies with the European Union General Data Protection Regulation (GDPR), California Consumer Privacy Act (CCPA), and SOC 2 Type II controls.

2. PII Logging Prohibitions

Personally Identifiable Information (PII) such as email addresses, social security numbers, passwords, payment details, and IP addresses must NEVER be logged in plain text. Logs must pass through automated masking filters before ingestion into Datadog / CloudWatch.

3. Data Encryption Standards

All sensitive data in transit must use TLS 1.3 encryption. All data at rest must use AES-256 encryption. Database snapshots and backups must be encrypted with dedicated AWS KMS keys.

4. Right to be Forgotten & Data Deletion

GDPR data erasure requests ('Right to be Forgotten') must be executed across all production and backup stores within 30 days of verified customer request.
