

Nexora Corporate Knowledge Base: Product Triage Guide

Target Role: PRODUCT | Version: Official | Published: 2026-09-24

1. Feature Prioritization (RICE Scoring)

Feature proposals are prioritized using the RICE framework: $(\text{Reach} \times \text{Impact} \times \text{Confidence}) / \text{Effort}$. High-RICE initiatives are slotted into quarterly product roadmaps.

2. User Feedback Loops

Customer feature requests from Zendesk, Gong, and sales calls are aggregated in Productboard and reviewed bi-weekly with engineering leads.
