

Nexora Corporate Knowledge Base: On-Call Compensation

Target Role: ENGINEERING | Version: Official | Published: 2026-09-25

1. On-Call Rotation Structure

Engineering services participate in a 7-day weekly on-call rotation with a Primary and Secondary engineer. Schedules are published 6 weeks in advance via PagerDuty.

2. Financial Compensation

Engineers receive an additional \$500 USD stipend per completed on-call week, paid on the subsequent payroll cycle.

3. Time in Lieu & Recovery

If an on-call engineer is paged during the night (10:00 PM to 7:00 AM) to resolve a Sev1/Sev2 incident, they are entitled to take the morning off (up to 4 hours) as paid recovery time.

6. Shadow Rotations

Engineers in Day 31-60 of onboarding join on-call shadow rotations: they observe pages, war rooms, and handoffs without primary responsibility, preparing for full rotation membership.

7. Handoff Procedure

Rotations hand off with a written sync covering active incidents, known flaky alerts, and in-flight deploys. Silent handoffs are not permitted; both engineers acknowledge in PagerDuty.

8. Secondary Escalation

If the Primary does not acknowledge within 10 minutes, PagerDuty escalates to the Secondary engineer, then to the engineering manager. Gaps in coverage are a Sev3 operational issue.
